EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Frank J. Kozak (Registration No. 32,908) on May 19, 2005.

The application has been amended as follows:

In the specification:

Please replace the abstract with the following:

A method for route calculation using real time traffic conditions is disclosed. A transmission that includes weightings indicative of traffic conditions on roads is received. Then, a solution route is calculated by forming a list of road segments. The list is formed by expanding a search tree comprised of gates. Each gate represents a physical location on a road segment and an accessible direction relative thereto. Each gate to which a weighting applies is incremented by an amount indicated in the transmission. The solution route is determined by expanding the search tree, which includes determining and evaluating successor gates.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Prior arts of record do not disclose a method for providing real time traffic weighted routes taught in claim 24 in which the weighting applicable to roads in the road network is transmitted wirelessly, the weightings are used for selecting route segments that form a solution route including a list of selection of the road segment records; the process for selecting the solution route segment records using a search tree and gates are taught in detail in claim 24.

3. Remark:

The 112 second paragraph rejection issued in the non-final rejection on September 13, 2004 should be corrected to the claim objection because it is clear to an ordinary person skilled in the art at the time the invention was made, the limitation "road segments" obviously refers to the "road segment records". However, to facilitate reading of the claim (although not necessary), it is refers that the "road segments" should be corrected to the "road segment records". In view of the amended claims 24 submitted on December 16, 2004, the claim objection is also withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
